+ Transparency

Digital Social and Welfare Services

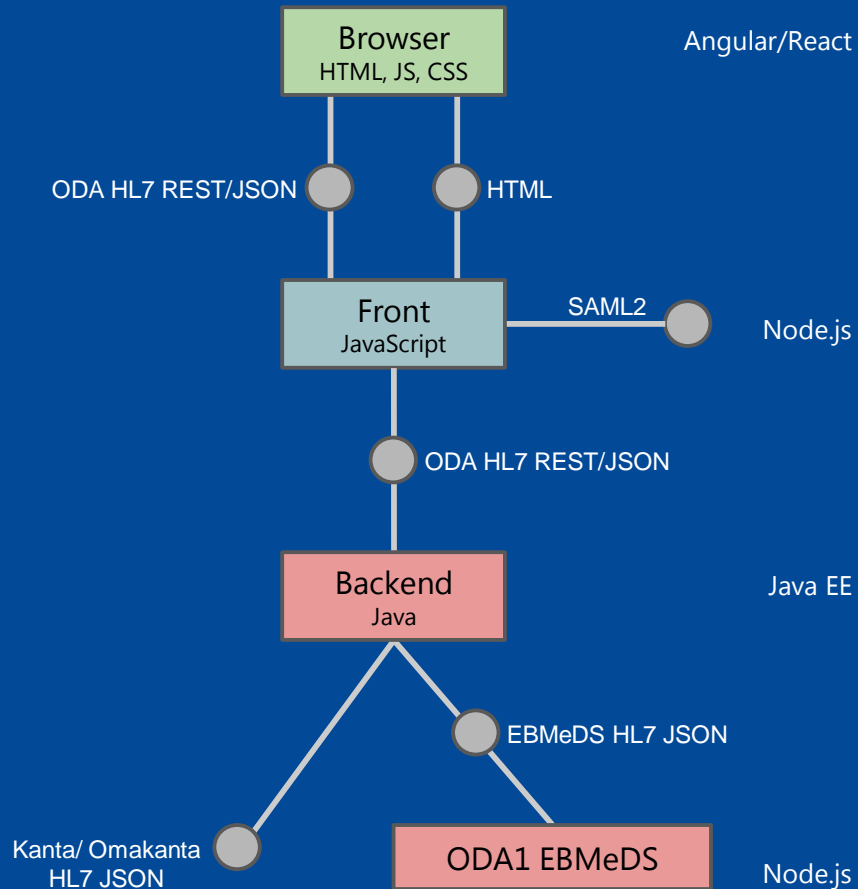

OMAOLO Vision of Customer-Oriented Services

Tech Stack

- Stores all data to Master Data Sources.
- Microservices architecture with SSO.
- Rich Client App.
- MyData App - user decides with their authority what data is shared.
- Roles for professional, family member, citizen/patient, social services, homecare and 3rd party commercial service producers - dynamically in the same user experience.
- Multichannel, multimodal architecture complies with single point of contact -policy.
- Level A healthcare customer data and Data Protection Law compliance - no EC Medical Device compliance required.

Logical Architecture
